Why pronunciation actually matters

> *You can have the right words and still not be understood. In Brazilian Portuguese,* how *you say it matters as much as what you say.*

The 3 reasons most English speakers plateau

🧠

They learn words, not sounds

Vocabulary gets you started. Pronunciation gets you understood — and keeps the conversation going.

👂

They don't train their ear

If you can't hear the difference between "pé" and "pê", you'll never say it right. This kit fixes that.

🎯

They practise silently

Reading doesn't build muscle memory. Speaking out loud — even alone — does. Every drill in this kit is designed to be said, not just read.

💡

THE SHIFT

You don't need a perfect accent. You need an intelligible one — where Brazilians understand you the first time, without asking you to repeat.

What to expect in 14 days

> *This is not a magic pill. It's a focused sprint. 10 minutes a day, done consistently, will change how you sound in real conversations.*

By the end of day 14, you'll be able to:

- ✓ Pronounce the **nasal sounds** (ão, em, ãe) without stopping to think
- ✓ Use the **Brazilian R** — including at the start of words and in "rr"
- ✓ Sound natural with **T/D before "i"** (tia, dia, dinheiro)
- ✓ Link words together the way **natives actually speak**
- ✓ Say **50 survival phrases** with natural rhythm and stress
- ✓ Hear the difference between sounds you couldn't distinguish before

REALISTIC EXPECTATION

Days 1–7 feel like work. Days 8–14 feel like it's clicking. The goal isn't perfection — it's consistency that compounds.

How to use the kit

10 minutes · every day · out loud

> *The kit has three parts that work together. Use all three to get the full effect — skipping the audio is like going to the gym and not lifting anything.*

Your daily 10-minute routine

1. **Open the e-book** to today's chapter. Read the explanation — it takes 2 min.

2. **Find the audio file** for today's module. Press play.
   🎧 **Slow version first** — listen without repeating

3. **Repeat out loud** with the audio — slow, then natural speed.
   🎙 **Record yourself** on your phone and compare

4. **Do the word drill** in the e-book. 5–8 words, out loud, twice.

5. **Pick 1 phrase** from the chapter. Use it today — in a message or out loud to yourself.

📁 **Audio files are organized in folders by chapter.** Each chapter in the e-book references its files directly — e.g. `Chapter_01_Rhythm_Stress/Lesson_01.mp3`. Keep your audio folder open alongside the e-book.

🔑 THE ONE RULE

Never read a drill silently. If your mouth isn't moving, you're not practising pronunciation — you're just reading. Say every single word out loud.

Your kit at a glance

Everything in this kit has a purpose. Here's what you have and how the pieces fit together.
